

What is a Registered Employer?

A Registered Employer is an organization that has entered into a partnership agreement with the Personal Support Worker (PSW) Registry of Ontario ("Registry") through a Memorandum of Understanding.

Why is my employer not included as a Registered Employer?

During the roll out of Phase One, the Registry will work with an initial group of employers to test the quality of its IT platform, onboarding processes and overall functionality. The Registry will extend its pool of registered employers through the establishment of new agreements.
